Portfolio

searchTree (Rails, React, Redux, JavaScript, Ruby, HTML5, CSS3, Webpack): Single-page community driven question and answer web app
Live link: https://search-tree.herokuapp.com/ GitHub: https://github.com/anel-guerrero/code
- Uses various React Lifecycle methods to ensure dynamic rendering of components
- Uses REST & CRUD operations
- Uses polymorphic associations to create votes on posts, which helps code to comply with DRY principle and makes the app use significantly less code and additional functions
- Uses Rails Active Record query to enable search for specific topics or key words
- Features back end user authentication, created with BCrypt in Rails
- Uses CSS Grid and HTML5 to ensure clean design

Bubble Party(JavaScript, Canvas, HTML5, CSS3, Webpack, Firebase): A game inspired by Bubble Shooter
Live Link: https://aneldanza.info/Bubble-Party/   GitHub: https://github.com/anel-guerrero/Bubble-Party
- Used Canvas to draw all of the moving parts
- Applied JavaScript event listeners to control the action and animations
- Created Firebase set up to store and update the highest score
- Applied recursion and math to calculate correct shooting angle and cluster of bubbles to drop
